PROFESSIONAL PROFILE

Data Quality Analyst (Data QA) | AI-Assisted Developer with hands-on experience in data migration, processing, validation, labeling, cleansing, and auditing within ERP and BI environments (Dynamics 365, Power BI, Tableau, SQL). I automate repetitive tasks using advanced Excel (VBA macros, Power Query) and Power Automate. I complement this profile with AI-assisted development in projects using Java, Python, TypeScript, Go, PHP, Kotlin, C++, and ETL data processing, NLP, and vector pipeline workflows (RAG, MCP, n8n) on local LLMs (Qwen, Gemma, AI-Edge). I am looking for roles in data quality and cleansing, BI support, process automation, or AI-assisted software development, where these strengths can add real value from day one.

Adaptable to repetitive processes with high attention to detail and operational support.

Availability: Immediate (Remote or On-site | Full-time or Part-time).

EDUCATION

Systems Engineering | *UNAD (Colombia)* Estimated start: October 2026

- Homologation of SENA Technology Degree in Software Analysis and Development toward a Systems Engineering degree. Enrollment in progress, pending semester assignment.

Software Development Technologist | *SENA (Colombia)* 2023 - 2025

- Overall GPA: 4.5/5.0 across all competencies.
- Key competencies: Software development (frontend, backend, database), solution design, software quality control, formative research.
- Capstone Project: Full-stack web application (Laravel, MySQL, Bootstrap).
- Complementary Courses: Data Analytics, Excel, Python, AI, BI, Cloud, C++.

EXPERIENCE

MICROHOME (Client: Gecolsa / SOE360 - Caterpillar) Bogotá, Colombia

Data Analyst (Fixed-term project contract) Jun 2026 - Jul 2026

- Migrated more than 165,000 accounting records to Dynamics 365 (Accounts Receivable).
- Created a VBA macro to generate more than 600 voucher batches with validation totals.
- Validated batches in Dynamics 365 via the Payment Journal, reconciling Excel totals against the system.
- Designed a Power Automate flow for uploading batches from Excel to a web browser.

RUNT (National Transit Registry) Bogotá, Colombia

Data Quality Analyst Ago 2024 - Jun 2025

- Automated data extraction/transformation from Azure DevOps using Excel Macros.
- Migrated dashboards from Tableau to Power BI, replicating KPIs, DAX, and client branding.
- Validated data quality and consistency in reports and BI visualizations.
- Parameterized data sources, update frequencies, and automatic alerts.
- Managed environments and structures on Microsoft Fabric platforms.
- Designed dimensional models (fact and dimension tables) from SQL Server via DBeaver.
- Normalization and definition of hierarchies, foreign keys, and star schema models in SQL.
- Managed bugs/tasks in Azure DevOps Boards, with reports for technical leads.
- Documentation and business process modeling using Bizagi and BPMN notation.

SKILLS

- **Practical Expertise (hands-on, real work experience)**

Data Quality Analysis & Automation

- **Data Quality:** Validation, auditing, and consistency control.
- **Advanced Excel:** Macros, Power Query, VBA, complex formulas.
- **Power BI/Tableau:** Interactive dashboards, DAX, report migration and replication.
- **SQL:** Queries, JOINS, dimensional modeling (SQL Server, DBeaver).
- **Azure DevOps:** Boards, work items, queries, task tracking.
- **Power Automate:** Automation flow design.
- **Process Documentation:** Bizagi, BPMN notation.

- **Project Tools (AI-assisted) and Theoretical Knowledge**

Software Development & ETL

- **Languages:** Python, Java, TypeScript, Go, Php, Kotlin, C++.
- **Backend Frameworks:** Spring Boot, FastAPI, Node.js, Fiber, Wails (Go).
- **Frontend Frameworks:** Angular, Next.js, React, Bootstrap, Tailwind.
- **Databases:** MySQL, MongoDB, SQL Server, PostgreSQL.
- **Infrastructure:** Vercel, Render, Netlify, MongoDB Atlas, Supabase.
- **Tools:** Git, GitHub, Docker, Jenkins, Postman, Shell (Bash), Scrum.
- **Data/Scraping:** Matplotlib, Seaborn, Pandas, Numpy, Selenium, Playwright, BeautifulSoup.

AI, NLP & Machine Learning

- **Techniques:** RAKE, Named Entity Recognition (NER), Web Workers, RAG, MCP, MediaPipe.
- **Libraries/Tools:** Scikit-learn (K-Means), Compromise.js, LanceDB (Vector Search), Sentence-transformers, Ollama, n8n, LocalForage (IndexedDB), Hugging Face.

- **Languages**

- **Spanish:** Native.
- **English:** Technical / Proficient in reading and writing.

FREELANCE PROJECTS

Rastrosauto | Vehicle Management Web System| [Link](#) Jul 2025 - Jan 2026

- Stack: Spring Boot, Maven, Angular, Bootstrap, PostgreSQL, Docker.
- Full CRUD application deployed on Render and Supabase featuring MVC architecture, REST API, and advanced vehicle filtering/comparison.
- User Registration and Authentication system implementation.
- Profile management including history tracking and favorite vehicles.

OrganizaText | AI-Powered Document Processing System| [Link](#) 2026

- Stack: Next.js, FastAPI, Go/Wails, MongoDB, LanceDB, Ollama, n8n, Jenkins, Kotlin.
- Privacy-first offline web app and Windows desktop app with full RAG and local LLM.
- In-browser NLP: Keyword extraction (RAKE), Entities (NER), Emails, and URLs.
- Semantic vector search with LanceDB, embeddings and sentence-transformers.
- Automated text categorization using n8n and MCP (Model Context Protocol).
- Automated CI/CD with Jenkins and deployment to Vercel.
- Android App (Kotlin/Jetpack Compose): NLP with RAKE, AI Edge with MediaPipe, Room DB.
- Jamstack serverless web architecture, local standalone, and Android MVVM app.

AREAS OF INTEREST

- Data quality, auditing, labeling, support and migration in ERP / BI systems and databases.
- Text mining / data mining, automatic keyword extraction and classification (NLP).
- Process automation and optimization, Excel, Power Automate, Artificial Intelligence.
- Data and catalog management for e-commerce (exploring).
- Self-taught learning and project development with emerging technologies.
