PROFESSIONAL PROFILE

Data Analyst & ETL Developer with hands-on experience in data analysis, processing, validation, and labeling. Specialized in Advanced Excel (Macros, Power Query), Power BI (Dashboards, DAX), SQL, and AI tools. Proficient in Extraction, Transformation, and Loading (ETL) processes, NLP, and task management within Azure DevOps. Experienced in report migration and workflow optimization through AI-driven automation. Highly adaptable to repetitive processes with strong attention to detail and operational support.

Availability: Immediate (Remote or On-site | Full-time or Part-time)

Salary Expectation: \$490 – \$680 USD (Negotiable)

EDUCATION

Software Development Technologist | SENA (Colombia) 2023 – 2025

- Academic Excellence Award (Honors).
- Capstone Project: Full-stack web application (Laravel, MySQL, Bootstrap).
- Key Coursework: Data Analytics, Advanced Excel, Python, AI, K-Means, C++, English.

EXPERIENCE

RUNT (National Transit Registry) Bogotá, Colombia

Data Assistant & Development Process Aide (Intern) Dec 2024 – Jun 2025

- Automated data extraction and transformation processes from Azure DevOps using Excel Macros.
- Executed visual migration of dashboards from Tableau to Power BI, replicating business logic and adjusting DAX measures.
- Documented dimensional models (Fact and Dimension tables) by extracting schemas from SQL Server via DBeaver for BI analysis.
- Managed daily tracking of bugs and tasks in Azure DevOps Boards, generating status reports for technical leads.
- Validated data quality and consistency across BI reports and visualizations.

Note: Affiliated with RUNT since August 2023 via SENA academic sponsorship.

Reference: Sidy Avila | +57 322 222 9322 | sidy.avila@runt.com.co

Independent Contractor Bogotá, Colombia

Contractor - Installations & Assembly Jan 2017 – Dec 2022

- Managed aluminum division installation projects, overseeing timelines and material resources.

Reference: Arturo Silva | +57 312 456 7890

Resellantas Ltda (Automotive Services) Bogotá, Colombia

Operational Assistant Oct 2015 – Oct 2016

- Managed automotive inventory (tires and batteries), generating stock reports and commercial data analysis.
- Generating inventory reports and analyzing business data.
- Controlled pricing and product turnover within the warehouse.

Reference: Vicente Castiblanco | +57 310 858 6456

SKILLS

Data Analysis & Automation

- **Advanced Excel:** Macros, Power Query, VBA, complex formulas.
- **Power BI/Visualization:** Interactive dashboards, DAX, Matplotlib, Seaborn.
- **SQL:** Queries, JOINS, filtering (SQL Server, DBeaver).
- **Azure DevOps:** Boards, work items, queries, project tracking.
- **ETL:** Web Scraping, Pandas, NumPy, Data cleaning and structuring.

Software Development

- **Languages:** Python, Java, TypeScript, Go, Php, Kotlin.
- **Frameworks Backend:** Spring Boot, FastAPI, Node.js, Fiber.
- **Frameworks Frontend:** Angular, Next.js, React, Bootstrap, Tailwind.
- **Databases:** MySQL, MongoDB, SQL Server, PostgreSQL.
- **Infrastructure:** Vercel, Render, Netlify, MongoDB Atlas, Supabase.
- **Tools:** Git, GitHub, Docker, Jenkins, Postman, Wails (Go), Shell (Bash), Scrum.

AI, NLP & Machine Learning

- **Techniques:** RAKE, Named Entity Recognition (NER), Web Workers, RAG, MCP, MediaPipe.
- **Libraries/Tools:** Scikit-learn (K-Means), Compromise.js, LanceDB (Vector Search), sentence-transformers, Ollama, n8n, localForage (IndexedDB), Hugging Face.

Languages

- **Spanish:** Native.
- **English:** Technical / Proficient in reading and writing.

CERTIFICATIONS

Software Development Technologist (Honors/Academic Excellence) | SENA | <https://certificados.sena.edu.co> 2025

Complementary Courses: Data Analytics, Excel, Python, AI, Cloud, C++ | SENA | <https://certificados.sena.edu.co> 2025

PROJECTS

Rastrosauto | Vehicle Management Web System | [Link](#)  2025

- Stack: Spring Boot, Maven, Angular, Bootstrap, PostgreSQL, Docker.
- Full CRUD application deployed on Render and Supabase featuring MVC architecture, REST API, and advanced vehicle filtering/comparison.
- User Registration and Authentication system implementation.
- Profile management including history tracking and favorite vehicles.

OrganizaText | AI-Powered Document Processing System | [Link](#)  2026

- Stack: Next.js, FastAPI, Go/Wails, MongoDB, LanceDB, Ollama, n8n, Jenkins, Kotlin.
- Privacy-first offline web app and Windows desktop app with full RAG and local LLM.
- In-browser NLP: Keyword extraction (RAKE), Entities (NER), Emails, and URLs.
- Semantic vector search with LanceDB and sentence-transformers.
- Automated text categorization using n8n and MCP (Model Context Protocol).
- Automated CI/CD with Jenkins and deployment to Vercel.
- Android App (Kotlin/Jetpack Compose): NLP with RAKE, AI Edge with MediaPipe, Room DB.
- Jamstack serverless web architecture, local standalone, and Android MVVM app.

AREAS OF INTEREST

- Process automation and optimization using Artificial Intelligence.
- Natural Language Processing (NLP) and Text Mining.
- Data analysis, labeling, and visualization.
- Self-taught learning and personal project development with emerging technologies.
