PROFESSIONAL PROFILE

Data Automation Developer | AI Automation | BI Developer | Data QA (DQA) with hands-on experience in data analysis, processing, validation, quality assurance, and labeling. Specialized in advanced Excel (automation with macros, Power Query), Power BI (dashboards, DAX), Tableau, SQL, dimensional modeling, ETL pipeline development with Python, TypeScript, and Kotlin, and AI tools (n8n, MCP, RAG, NLP, AI Edge). Experience in task management with Azure DevOps, projects with modern architectures (Jamstack, microservices, CI/CD), local LLMs, and workflow optimization through AI-driven automation. Adaptable to repetitive processes with high attention to detail and operational support.

Availability: Immediate (Remote or On-site | Full-time or Part-time)

Salary Expectation: \$490 – \$680 USD (Negotiable)

EDUCATION

Systems Engineering | UNAD (Colombia) **Estimated start: August 2026**

- Status: homologation request under review by the School Secretary/Council.
- Homologation of SENA Technology Degree in Software Analysis and Development toward a Systems Engineering degree.
- Semester assignment pending based on academic evaluation results.

Software Development Technologist | SENA (Colombia) **2023 – 2025**

- Overall GPA: 4.5/5.0 across all competencies.
- Key competencies: Software development (frontend, backend, database), solution design, software quality control, formative research.
- Capstone Project: Full-stack web application (Laravel, MySQL, Bootstrap).
- Key Coursework: Data Analytics, Advanced Excel, Python, AI, K-Means, C++, English.

EXPERIENCE

RUNT (National Transit Registry) **Bogotá, Colombia**

BI Developer & Data Automation **Ago 2024 – Jun 2025**

- Automated data extraction and transformation processes from Azure DevOps using Excel Macros.
- Performed visual migration of dashboards from Tableau to Power BI, replicating structure, KPIs, client color palettes, and adjusting DAX measures for business analysis.
- Validated data quality and consistency in reports and BI visualizations.
- Parameterized data sources, update frequencies, and automatic alerts.
- Managed environments and structures on Microsoft Fabric platforms.
- Designed dimensional models (fact and dimension tables) by extracting fields from SQL Server via DBeaver for BI analysis.
- Normalization and definition of hierarchies, foreign keys, and star schema models in SQL.
- Managed daily bug and task tracking in Azure DevOps Boards, generating status reports for technical leads.
- Documentation and business process modeling using Bizagi and BPMN notation.

Reference: Sidy Avila | +57 322 222 9322 | sidy.avila@runt.com.co

SKILLS

Data Analysis & Automation

- **Advanced Excel:** Macros, Power Query, VBA, complex formulas.
- **Power BI/Visualization:** Interactive dashboards, DAX, Matplotlib, Seaborn.
- **SQL:** Queries, JOINS, filtering (SQL Server, DBeaver).
- **Azure DevOps:** Boards, work items, queries, project tracking.
- **ETL:** Web Scraping, Pandas, NumPy, Data cleaning and structuring.

Software Development

- **Languages:** Python, Java, TypeScript, Go, Php, Kotlin.
- **Frameworks Backend:** Spring Boot, FastAPI, Node.js, Fiber, Wails (Go).
- **Frameworks Frontend:** Angular, Next.js, React, Bootstrap, Tailwind.
- **Databases:** MySQL, MongoDB, SQL Server, PostgreSQL.
- **Infrastructure:** Vercel, Render, Netlify, MongoDB Atlas, Supabase.
- **Tools:** Git, GitHub, Docker, Jenkins, Postman, Shell (Bash), Scrum, Bizagi.

AI, NLP & Machine Learning

- **Techniques:** RAKE, Named Entity Recognition (NER), Web Workers, RAG, MCP, MediaPipe.
- **Libraries/Tools:** Scikit-learn (K-Means), Compromise.js, LanceDB (Vector Search), sentence-transformers, Ollama, n8n, localForage (IndexedDB), Hugging Face.

Languages

- **Spanish:** Native.
- **English:** Technical / Proficient in reading and writing.

CERTIFICATIONS

Software Development Technologist (Honors/Academic Excellence) | SENA | <https://certificados.sena.edu.co> 2025

Complementary Courses: Data Analytics, Excel, Python, AI, Cloud, C++ | SENA | <https://certificados.sena.edu.co> 2025

FREELANCE PROJECTS

Rastrosauto | Vehicle Management Web System | [Link](#)  Jul 2025 - Jan 2026

- Stack: Spring Boot, Maven, Angular, Bootstrap, PostgreSQL, Docker.
- Full CRUD application deployed on Render and Supabase featuring MVC architecture, REST API, and advanced vehicle filtering/comparison.
- User Registration and Authentication system implementation.
- Profile management including history tracking and favorite vehicles.

OrganizaText | AI-Powered Document Processing System | [Link](#)  2026

- Stack: Next.js, FastAPI, Go/Wails, MongoDB, LanceDB, Ollama, n8n, Jenkins, Kotlin.
- Privacy-first offline web app and Windows desktop app with full RAG and local LLM.
- In-browser NLP: Keyword extraction (RAKE), Entities (NER), Emails, and URLs.
- Semantic vector search with LanceDB and sentence-transformers.
- Automated text categorization using n8n and MCP (Model Context Protocol).
- Automated CI/CD with Jenkins and deployment to Vercel.
- Android App (Kotlin/Jetpack Compose): NLP with RAKE, AI Edge with MediaPipe, Room DB.
- Jamstack serverless web architecture, local standalone, and Android MVVM app.

AREAS OF INTEREST

- Process automation and optimization using Artificial Intelligence.
- Natural Language Processing (NLP) and Text Mining.
- Data analysis, labeling, and visualization (BI / DQA).
- Self-taught learning and personal project development with emerging technologies.
